

# U.S. Macro Outlook

- NOVEMBER 2025/BRIAN LEUNG  
DIRECTOR, KKR GLOBAL MACRO

# Disclaimer

- The views expressed in this presentation are the personal views of Henry McVey of Kohlberg Kravis Roberts & Co. L.P. (together with its affiliates, "KKR") and do not necessarily reflect the views of KKR itself or any investment professional at KKR. This presentation is not research and should not be treated as research. This presentation does not represent valuation judgments with respect to any financial instrument, issuer, security or sector that may be described or referenced herein and does not represent a formal or official view of KKR. This presentation is not intended to, and does not, relate specifically to any investment strategy or product that KKR offers. It is being provided merely to provide a framework to assist in the implementation of an investor's own analysis and an investor's own views on the topic discussed herein.
- The views expressed reflect the current views of Mr. McVey as of the date hereof and neither Mr. McVey nor KKR undertakes to advise you of any changes in the views expressed herein. References to "we", "us," and "our" refer to Mr. McVey and/or KKR's Global Macro and Asset Allocation team, as context requires, and not of KKR. Opinions or statements regarding financial market trends are based on current market conditions and are subject to change without notice. References to a target portfolio and allocations of such a portfolio refer to a hypothetical allocation of assets and not an actual portfolio. The views expressed herein and discussion of any target portfolio or allocations may not be reflected in the strategies and products that KKR offers or invests, including strategies and products to which Mr. McVey provides investment advice to or on behalf of KKR. It should not be assumed that Mr. McVey has made or will make investment recommendations in the future that are consistent with the views expressed herein or use any or all of the techniques or methods of analysis described herein in managing client or proprietary accounts. Further, Mr. McVey may make investment recommendations and KKR and its affiliates may have positions (long or short) or engage in securities transactions that are not consistent with the information and views expressed in this document.
- This presentation has been prepared solely for informational purposes. The information contained herein is only as current as of the date indicated and may be superseded by subsequent market events or for other reasons. Charts and graphs provided herein are for illustrative purposes only. The information in this presentation has been developed internally and/or obtained from sources believed to be reliable; however, neither KKR nor Mr. McVey guarantees the accuracy, adequacy or completeness of such information. Nothing contained herein constitutes investment, legal, tax or other advice nor is it to be relied on in making an investment or other decision.
- There can be no assurance that an investment strategy will be successful. Historic market trends are not reliable indicators of actual future market behavior or future performance of any particular investment which may differ materially and should not be relied upon as such. Target allocations contained herein are subject to change. There is no assurance that the target allocations will be achieved, and actual allocations may be significantly different than that shown here. This presentation should not be viewed as a current or past recommendation or a solicitation of an offer to buy or sell any securities or to adopt any investment strategy.
- The information in this presentation may contain projections or other forward-looking statements regarding future events, targets, forecasts or expectations regarding the strategies described herein, and is only current as of the date indicated. There is no assurance that such events or targets will be achieved and may be significantly different from that shown here. The information in this presentation, including statements concerning financial market trends, is based on current market conditions, which will fluctuate and may be superseded by subsequent market events or for other reasons. Performance of all cited indices is calculated on a total return basis with dividends reinvested. The indices do not include any expenses, fees or charges and are unmanaged and should not be considered investments.
- The investment strategy and themes discussed herein may be unsuitable for investors depending on their specific investment objectives and financial situation. Please note that changes in the rate of exchange of a currency may affect the value, price or income of an investment adversely.
- Neither KKR nor Mr. McVey assumes any duty to, nor undertakes to update forward looking statements. No representation or warranty, express or implied, is made or given by or on behalf of KKR, Mr. McVey or any other person as to the accuracy and completeness or fairness of the information contained in this presentation, and no responsibility or liability is accepted for any such information. By accepting this presentation in its entirety, the recipient acknowledges its understanding and acceptance of the foregoing statement.
- The MSCI sourced information in this presentation is the exclusive property of MSCI Inc. (MSCI). MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, reviewed or produced by MSCI.

# Where We Are Focused

---

## *Regime Change* Thesis Accelerates Amidst Bumpy Growth

Our *Regime Change* thesis, which is driven by bigger deficits, heightened geopolitical competition, a messy energy transition, and stickier inflation, is now being also impacted by a weaker dollar. We do not see a recession, but our top-down framework suggests flatter returns amidst an asynchronous global economy, which will likely require a different playbook for capital deployment. Diversification and non-correlation now matter more.

---

## High Conviction Investment Themes

We remain maximum bullish on KKR's investing themes. We favor the Security of Everything, Capital Heavy to Capital Light, Productivity/Worker Retraining, Collateral-Based Cash Flows, Growth in Data, etc.

---

## Mitigate Risks

There are several important macro risks to consider. Market vulnerabilities include a weaker dollar, higher long-term rates, a slowdown in AI spending, and obviously increased geopolitical tensions. Linear pacing, more moderate leverage, and less duration have become portfolio management prerequisites for success.

---

## Asset Allocation: Make Your Own Luck

Now is time to 'Make Your Own Luck'. We see higher markets, but we want to increase our chance of outperformance. Within Credit, focus on dispersions and getting higher up in the capital structure. In Real Assets, lean into collateral-based cash flows. In the highest returning strategies such as Private Equity, focus on repeatable processes, control positions, operational improvement, and a wide sourcing funnel.

The above reflects the current market views, opinions and expectations of the speaker and should not be viewed as a solicitation of any KKR sponsored product or investment.

# Regime Change: From 'Secular Stagnation' to Post-Covid Reflation

Higher Inflation Volatility and Changing Stock/Bond Correlation Imply Greater Need for Portfolio Diversification and Inflation Hedging

**Macro Regime:**

- The era of fiscal prominence (higher deficits and more industrial policy) leads to a higher-pressure economy characterized by higher inflation, higher nominal GDP growth and higher rates, which in turn drives a greater need for productivity improvements
- As a result, we expect the stock/bond correlation to stay positive, term premium to rise, real assets to outperform, Rest-of-World equities to be more competitive with U.S. equities, and gold should be an effective hedge (against weaker USD) for portfolios

| 'Secular Stagnation'            |  | Post-Covid Reflation            |  |
|---------------------------------|--|---------------------------------|--|
| Key Characteristics             |  |                                 |  |
| Post-GFC to Covid               |  | Covid to Today                  |  |
| Benign globalization            |  | Great power competition         |  |
| Loose labor market              |  | Tighter labor                   |  |
| Net oil importer                |  | Net oil exporter                |  |
| Laissez-Faire                   |  | Strategic industrial policy     |  |
| Fiscal prudence                 |  | Fiscal prominence               |  |
| Lower deficits                  |  | Higher deficits                 |  |
| Consumer deleveraging           |  | Healthier balance sheets        |  |
| Low inflation                   |  | Higher inflation                |  |
| Low NGDP growth                 |  | Higher NGDP growth              |  |
| Low productivity                |  | Higher productivity             |  |
| ZIRP                            |  | Higher rates                    |  |
| Implications                    |  |                                 |  |
| Post-GFC to Covid               |  | Covid to Today                  |  |
| Negative stock/bond correlation |  | Positive stock/bond correlation |  |
| Low term premium                |  | Higher term premium             |  |
| Buy long duration bonds         |  | Buy real assets                 |  |
| Buy tech growth                 |  | Buy quality                     |  |

# Regime Change: Higher Inflation Volatility and Changing Stock/Bond Correlation Imply Greater Need for Portfolio Diversification and Inflation Hedging

Higher and More Volatile Inflation → Fixed Income is Likely to Be a Less Effective Shock Absorber Going Forward

The Return of Inflation Volatility on a Structural Basis Due to the Interplay of Intensifying Geopolitics, Economic Nationalism, and Fiscal Prominence

Since Covid, The Stock-Bond Correlation Has Reverted Back to the 1960s-1990s Paradigm, When Equity Market Sell-Offs Coincided With Higher Not Lower Bond Yields

Data as of 2Q2025. Source: KKR GMAA, Bloomberg

Data as of 2Q2025. Source: KKR GMAA, Bloomberg, S&P

# Regime Change: Gold/Hard Assets As a Portfolio Hedge Against Currency Debasement Worries

Together With Bonds, the U.S. Dollar Has Also Become a Less Reliable ‘Shock Absorber’, In Our View

Note: Chart shows S&P 500 corrections of 15% or more since 2010 and ‘industrial recession’ in 2016  
Data as of October 2025. Source: KKR GMAA, Bloomberg

The Relationship Between Gold and Real Rates Has Decoupled Since the Russia/Ukraine War

Data as of October 2025. Source: KKR GMAA, Bloomberg

# U.S. Economic Outlook: “It Is Hard to Hurt Yourself Too Badly Falling Out of A Basement Window” ...

We See Below-Trend U.S. Real GDP Growth of 1.5-2.0% for 2025

Data as of June 2025. Source: U.S. Bureau of Economic Analysis, Haver Analytics, KKR GMAA

Our Business Cycle Indicator: Rolling Downturns and Rolling Recoveries Have Characterized the Current Expansion

Data as of September 2025. Source: U.S. Bureau of Economic Analysis, Haver Analytics, KKR GMAA

# ...Our Base Case Is “Muddle-Through”, But We Do Not See a Hard Landing

Growth Down, Inflation Up. But Deep Recessions Are Usually Preceded by Credit/Capex Excesses, Neither of Which Has Emerged Thus Far

Five Years Into the Expansion, U.S. Corporate and Consumer Leverage Ratios Are Still Hovering At Multi-Year Lows. Leverage Build-Up Has Occurred in the Government Sector This Time

Data as of 2Q2025. Source: KKR GMAA, Federal Reserve, BEA, Haver Analytics  
Gray shading denotes recessionary quarters

Adding Up All The Moving Pieces, We Think the Net Fiscal Impulse for the Economy Could Be Modestly Expansionary for FY2026

Estimates of OBBB provisions for FY2026 (starting 10/1/25) is relative to current policy baseline  
^ Based on incremental tariff revenue expected for FY2026, assuming Supreme Court upholds IEEPA tariffs and 50/50 incidence between consumers and businesses  
Note: household tax cuts include individual tax cuts (SALT, standard deduction, and child tax credit) and retroactive tax cuts (deductions for tips, overtime, auto loans, and senior citizens)  
Business tax cuts include bonus depreciation for equipment and manufacturing structures, R&D expensing, interest deductibility and increased chip manufacturing tax credit  
Source: KKR GMAA, CBO, Evercore ISI

# Stronger Productivity Growth Is the ‘Secret Sauce’ to Extending the Business Cycle

Stronger Productivity Would Dampen Inflationary Pressures and Help Preserve Corporate Margins

Since The Launch Of ChatGPT In November 2022, Real Revenue Per Worker For The S&P 500 Has Risen 5.5%, Following Two Decades Of Stagnation

Note: 1960s refer to 1959-68; 1990s-00s refer to 1995-05; 1970s refer to 1973-79; 2010s refer to 2010-19; 1980s refer to 1980-88.  
Data as of 2Q2025. Source: Bloomberg, Federal Reserve Bank of San Francisco

Data as of September 2025. Source: Wells Fargo Securities, Factset

# AI/Tech-Related Investments Showing No Signs of Slowing

With Some Exceptions, Hyperscalers Have Generally Been Able To Fund The AI Capex Via Cash Flow Generation And Existing Cash Balances Rather Than Debt Financing

AI-Related Capex is Now Roughly 5% of U.S. GDP and Growing ~10% Per Year...But The Level of Spend Still Pales Relative to the Late-90s / Early 2000s Tech Boom

Note: Hyperscalers include MSFT, AMZN, GOOGL, META and ORCL  
Source: KKR GMAA, Bloomberg

Data as at 2Q2025. Source: Bloomberg, BEA, Census

# Headwind #1: U.S. Housing Does Not Work With 6-7% Mortgage Rate

Housing Activity is Hovering at 40-Year Lows...Weighed Down By High Mortgage Rates and Affordability Challenges

As Inventories Rise, Home Prices Have Been Deflating Across The Country (Especially, Florida, Arizona, Texas and California)

Data as of September 2025. Source: KKR GMAA, Bloomberg, Zillow, NAR

# Headwind #2: U.S. Labor Market is Slowing With Private Sector Job Creation Hovering Near Stall Speed

Breadth of Labor Market Remains An Issue. Excluding Education and Healthcare, Private Sector Job Growth Has Basically Ground to a Halt

If Not For Collapsing Labor Force Participation (Lower Immigration and Lower Labor Supply) Since April 2025, The Unemployment Rate Would Have Climbed To 4.7% in August 2025 Instead of 4.3%

Data as of August 2025  
Source: KKR GMAA, Bloomberg, BLS

# Headwind #3: Tariff Uncertainty Will Likely Persist

We Are Focused on a Variety of Scenarios With a Range of Outcomes

When It Comes To Tariff Mitigation, The Most Common Response Is Raising Prices, Followed By Renegotiating With Suppliers. These Strategies Are The Fastest To Implement But Depend On Companies Having Strong Pricing And Bargaining Power

**Company Survey: What Are Your Tariff Mitigation Strategies?**  
(% Saying Yes - Select All That Apply)

Data as of September 2025. Source: KKR GMAA, USITC, Bloomberg

# U.S. Inflation Outlook: We Expect Services Disinflation to Provide a Meaningful Offset to Higher Tariff-Induced Goods Inflation

Core Goods Inflation Will Heat Up, But More Than Offset By Softer Shelter Inflation and Moderating (Albeit Sticky) Core Services xShelter Inflation, In Our View

We Expect Headline and Core CPI to Average Roughly 3% This Year and Next (2.5% is Our Long-Term Run-Rate Assumption)

Data as of September 2025. Source: Bloomberg, Atlanta Federal Reserve Bank, BLS

## KKR GMAA U.S. CPI FORECAST DETAILS

| KKR GMAA U.S. CPI FORECAST DETAIL        |             |             |             |             |             |             | Full-Year 2024 | Full-Year 2025e | Full-Year 2026e |
|------------------------------------------|-------------|-------------|-------------|-------------|-------------|-------------|----------------|-----------------|-----------------|
|                                          | 3Q25        | 4Q25e       | 1Q26e       | 2Q26e       | 3Q26e       | 4Q26e       |                |                 |                 |

Data as of September 2025. Source: Haver Analytics, BLS.

# U.S. Rates Outlook: More Fed Easing to Come, But We Expect the 10yr Treasury Yield To Stay Higher-For-Longer

We Expect Another Four Fed Cuts Over The Next 12 Months, With Long-Term ‘Neutral’ Rate ~3%. Real Rates Remain Too Restrictive Today, In Our View

We Embed A Higher Term Premium In Our Forecast For Rates, Due to Positive Stock/Bond Correlations, Bigger Deficits, Higher Bond Volatility, And Diminished Foreign Appetite On The Margin

Data as of September 2025. Source: Bloomberg, GMAA

Data as of September 2025. Source: Bloomberg, KKR GMAA

# U.S. Fiscal Sustainability: Investor Discomfort With Wide Deficits Is Often Expressed Through Currency Weakness, Rather Than Surge in Govt Bond Yields

There Are Few Ambitious Spending Programs from the New Administration, and the Biggest Line Items Constitute an Extension of Current Policy (TCJA Tax Cuts)

|                           | 2025  | 2026  | 2027  | 2028  | 2029  |
|---------------------------|-------|-------|-------|-------|-------|
| Current Law Deficit       | 1,915 | 1,779 | 1,746 | 1,973 | 2,001 |
| Increase in Spending      | 59    | 460   | 539   | 494   | 354   |
| Impact on Debt Service    | 1     | 11    | 29    | 48    | 64    |
| Tariff Revenue            | -25   | -280  | -280  | -280  | -280  |
| Total Increase in Deficit | 35    | 191   | 288   | 262   | 138   |
| Total Deficit             | 1,950 | 1,970 | 2,034 | 2,235 | 2,139 |
| Deficit as % of GDP       | 6.5%  | 6.3%  | 6.3%  | 6.6%  | 6.1%  |

Estimates consistent with a ~15% tariff rate on 2.5tn of goods, at a 75% multiplier. For conservatism, deficit growth based on run-rate 4% NGDP growth. Data as of May 31, 2025. Source: PSC, Bloomberg, KKR GMAA

High Levels of Government Debt Tend to Lead to Weaker Currencies...Not Necessarily Higher Bond Yields

| Major Government Deleveraging Episodes |       |         |       |        |          |

# U.S. vs Rest-of-World: From 'Exceptional' to 'Less Exceptional'

## Six Reasons Why Rest-of-World Assets Could Become More Competitive Going Forward

1. **Initial conditions:** U.S. assets are over-owned and richly valued
2. **Fiscal impulse:** U.S. fiscal stance turning less expansionary, while RoW is turning more expansionary
3. **Diminished U.S. growth prospects** relative to baseline due to negative supply shocks (e.g., tariffs, deportations, etc)
4. **Erosion of policy certainty** (e.g., tariffs, Fed independence, etc)
5. **U.S. was flattered – on a relative basis - by temporary factors** from 2022 inflation scare
6. **U.S. tech / AI leadership** challenged by China and sector is morphing from asset-lite to capex growers

## Stark Divergence Between Record Margins For the Mega-Caps and Stagnant Margins For the Rest

Data as of October 2025. Source: KKR GMAA, Bloomberg, Federal Reserve, S&P

## The U.S. Dollar is Still Overvalued By ~15% and We See More Weakness Ahead Structurally

# Conclusions: Regime Change Thesis Intact

01

In Our *Regime Change* thesis, we have migrated from benign globalization to one of Great Power Competition. Geopolitics, bigger deficits, a messy energy transition, and stickier inflation are the four factors on which to focus

---

02

There are several mega-investment themes of generational importance that we believe require trillions of dollars of capital to support their growth

---

03

Things that could bump in the night: USD, bigger deficits, geopolitical tensions, and slowing productivity

---

04

Asset Allocation: Control your destiny with the macro and make your own luck with the micro
